*PaNOSC & ExPANDS face-to-face meeting
Prague, Czech Republic*

PaN Ontologies Sustainability and Community Engagement

Goal is for PaN Ontologies (focussing initially on PaNET) to be **actively developed** and **maintained** by the entire PaN community, beyond the end of ExPaNDS and PaNOSC.

Initial sustainability and governance model to be established, to be developed over time.

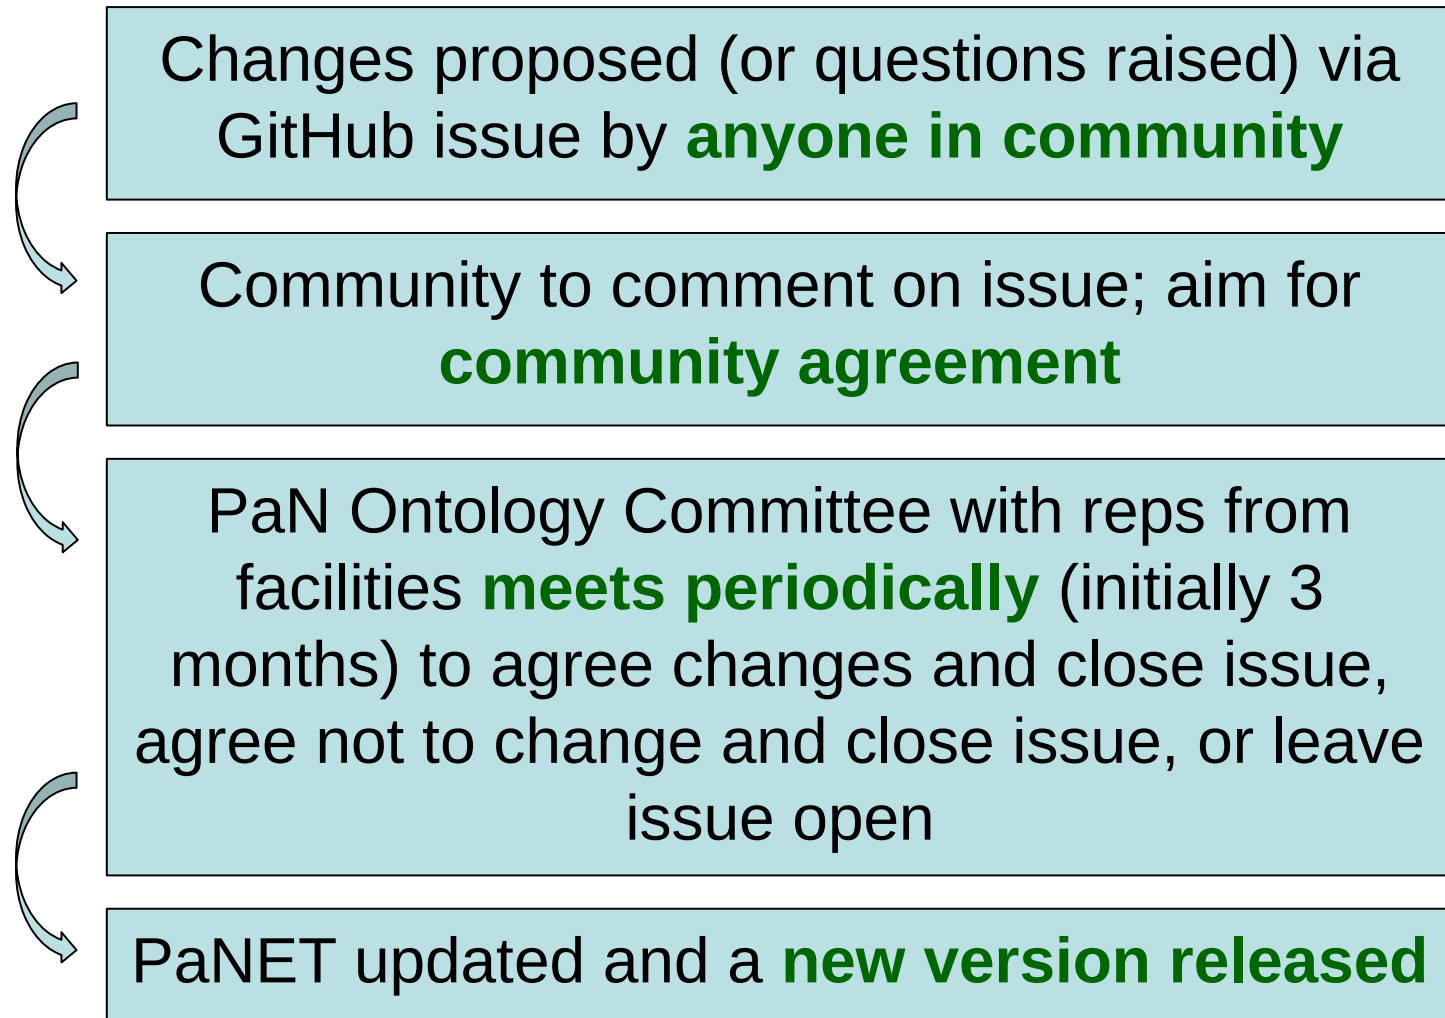

Provide a **process** for receiving, discussing, agreeing and implementing changes to the ontology.

Largely for **new techniques** (or changes), but to include all aspects of the ontology, such as mappings to other ontologies and annotation properties.

Workflow based on **GitHub**: [GitHub - ExPaNDS-eu/ExPaNDS-experimental-techniques-ontology](https://github.com/ExPaNDS-eu/ExPaNDS-experimental-techniques-ontology): EU Photon and Neutron Ontologies (task 3.2)

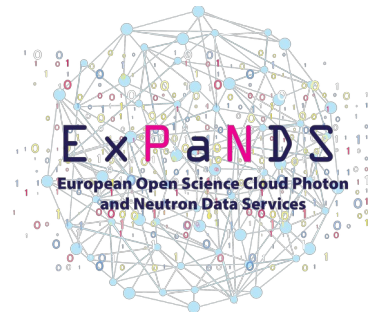

PaNET Sustainability Workflow

Roles and initial role sustainability team.

Committee Chair	Steve Collins (Diamond)
Workflow Team Leader	Alejandra Golzalez-Beltran (STFC)
Executive Secretary	Kat Roarty (Diamond)
Release Team Leader	Steve Collins (Diamond)
Communications Team Leader	Paul Millar (DESY)

Facilities representation (with voting rights)

	Heike Goerzig
	Paul Millar
	Alejandra Gonzalez-Beltran
	Lajos Schrettner / Balazs Bago
	Steve Collins
<Your facility here?>	<Your name here?>

What we want from you

Feedback: did we miss anything?

Endorsement: you think this approach is reasonable?

Thanks for listening!
