ELI User Meeting 2025

18–20 June 2025

The Extreme Light Infrastructure ERIC

Szeged, Hungary

Dear Partners,

The [ELI User Programme](#) has made significant progress since its launch in 2022 highlighting the growing demand for ELI's state-of-the-art facilities. The bi-annual calls in Spring and Autumn ensure regular opportunities for Users to submit groundbreaking proposals. In parallel the ELI Facilities continue to enhance the technical performance parameters of their experimental suite, while also ramping up and integrating further scientific equipment into the offer.

As a core event gathering the ELI User Community, the [2025 User Meeting](#) is planned for 18-20 June 2025 in Szeged, Hungary. This meeting provides a valuable opportunity to foster knowledge exchange and collaboration, showcases groundbreaking results from user campaigns, and sparks new collaborations through a dynamic mix of scientific and social programmes.

This year's agenda will feature engaging thematic workshops on emerging technologies and instrumentation, a dedicated User Experience Exchange session, and a Poster Session to highlight experimental opportunities. These discussions will be complemented by networking opportunities and laboratory tours showcasing the ELI ALPS Facility.

The ELI User Meeting offers a unique opportunity to connect with a diverse scientific community at the forefront of laser research and technology. Sponsors will have direct access to the participating research professionals and partners from academia and industry, the opportunity to present your company's products and innovations, and explore potential collaborations that drive progress in scientific and technological fields.

The following pages outline the various sponsorship opportunities — ELI looks forward to welcoming you!

On behalf of

User Meeting 2025 Organising Committee

About the ELI User Meeting 2025

The ELI ALPS Facility will host this year's **User Meeting in Szeged, Hungary**, from 18 – 20 June 2025. The event's overall goal is to showcase ELI's scientific offer while engaging with the User Community to gain valuable feedback on scientific and technical developments and what services are most useful to support researchers during the proposal submission process.

The 2025 edition will feature an [engaging programme](#) designed to foster knowledge exchange and collaboration. The interactive sessions will **focus on key technologies, instrumentation, mission areas**, and other relevant topics, with input from experts across the ELI Facilities. It will also promote new initiatives and collaborations, encouraging fresh ideas and partnerships.

A dedicated **User Experience Exchange** session will provide an open platform for participants to share insights, challenges, and best practices. To showcase the latest research, a **Poster Session** will be included, highlighting exciting scientific work, with awards presented to promising young scientists for their contributions.

More information and updates will be shared on the event's indico page:
<https://indico.eli-laser.eu/e/UM2025>

History

Continuing the tradition of **engaging with the scientific community through dedicated user events**, the first joint ELI User Meeting took place in November 2022, featuring parallel sessions hosted at the ELI Facilities. Prior to this, each of the Facilities organised User Meetings specific to their respective User Communities. The annual joint event rotates between the ELI locations.

At the previous User Meeting held in Prague, nearly 150 participants from 20 countries joined to **gain first-hand introduction to the scientific offer** of the ELI Facilities, **key results from user experiments**, as well as the outcomes and future developments of the maturing User Programme. The meeting was complemented by the Joint ELI Workshop on Advanced Technologies to **enhance collaborations from the user community around the ELI instrumentation**. From 2025, all these elements will be incorporated into the main User Meeting programme for an enhanced experience.

About the Extreme Light Infrastructure (ELI)

The Extreme Light Infrastructure is the world's largest and most advanced collection of high-power lasers. As an international user facility dedicated to multi-disciplinary science and research applications, ELI provides access to world-class high-power, high-repetition-rate laser systems and enables cutting-edge research in physical, chemical, materials, and medical sciences, as well as breakthrough technological innovations.

The state-of-the-art research capacities at the ELI Facilities

The ELI ERIC operates as a single multi-site organisation with complementary facilities specialised in different fields of research with extreme light: ELI Beamlines in Dolní Břežany (Czech Republic) and ELI ALPS in Szeged (Hungary). Between the ELI ERIC Facilities, over 600 scientists, technicians, and support staff work together to enable user access and breakthrough science.

Szeged and ELI ALPS

Szeged is the seat of Csongrád-Csanád County and is located in the centre of the South Alföld (Southern Great Plain) Region, at the confluence of the Maros and Tisza rivers. It is the largest city in south-eastern Hungary, with approximately 160,000 inhabitants. Szeged is often referred to as the "city of sunshine" with over 2,100 sunny hours each year.

Szeged is a "Regional knowledge centre" due to the outstanding work of the [University of Szeged](#) and the [Biological Research Centre](#) – and now the [Extreme Light Infrastructure](#). Szeged offers a hive of activities and tourist spots which a visitor can enjoy in the city.

The event venue is the [ELI ALPS Facility](#), easily accessible via the main highway and well-connected to the city. Designed to meet the unique demands of cutting-edge research, it also offers an ideal venue for a variety of events. While Building A houses state-of-the-art laser technology halls, Building C is the vibrant hub for conferences and social gatherings.

At its heart lies the striking "Brain" conference hall, accommodating 200 guests, surrounded by open, light-filled spaces—ideal for poster sessions, exhibitions, and networking. The facility also offers multiple smaller meeting rooms and additional areas for displaying promotional materials, with a professional team supporting events in this dynamic research environment. The Facility accommodates almost 300 in-house staff.

Why become a sponsor of the ELI User Meeting?

Sponsors will have the opportunity to showcase their company to a diverse scientific audience and interact with participants through a dynamic and varied event programme.

Key benefits:

Branding

- **Brand Visibility:** Gain exposure through online and on-site presence and event materials, showcasing your brand to the audience and strengthen your company's image.
- **Showcase Expertise:** Highlight products, technologies, and services through exhibition opportunities during the event and exchanges with the audience.
- **Positioning as a Key Partner, Supplier, Collaborator:** Presentation as a supporter of cutting-edge laser science and technology by aligning with this popular scientific event.

Networking

- **Direct Engagement with Participants:** Have a dedicated space to interact with participants, fostering relationships within a diverse scientific community from all over the world.
- **Networking Opportunities:** Connect with top scientists and established professionals of the field, creating valuable partnerships and connections.
- **Explore Joint Cooperation Opportunities with ELI** to foster collaboration and innovation in key scientific and technological areas.
- **Discover Cutting-edge Science and Gain Valuable Insight:** Learn more about the latest scientific developments and achievements at ELI and in the field of laser physics.
- **Become Part of the ELI Community:** The ELI User Meeting is more than just an event; it provides an opportunity to exchange ideas and build a sense of community in which partners can be part of.

Sponsorship packages

GOLDEN EXHIBITOR PACKAGE

- Company logo featured as a sponsor on the event website, the programme, and the information brochure and highlighted as a golden-level supporter of the event.
- Sponsor of the Conference dinner - the networking highlight of the event.
- Option of displaying company videos/advertisements during the breaks in the conference hall and atrium screens.
- Special Company Feature on the ELI social media channels (with content and visual as agreed).
- Possibility of placing promotional materials, flyers and publications at the event venue.
- Possibility of placing 1 roll-up by the registration and entrance to the main lecture hall venue.
- Information/exhibition stand during the conference in a prominent location on 18-20 June for 2 company delegates (including a table with two chairs, and electricity).

Package price: Net 5000 EUR

SILVER EXHIBITOR PACKAGE

- Company logo featured as a sponsor on the event website, the programme, and the information brochure and highlighted as a silver-level supporter of the event.
- Possibility of placing promotional materials, flyers, and publications at the event venue.
- Possibility of placing 1 roll-up at the User Meeting venue.
- Information/exhibition stand during the conference on 18-20 June and 1 company delegate (including a table with two chairs, and electricity).

Package price: Net 3000 EUR

BRONZE EXHIBITOR PACKAGE

- Company logo featured as a sponsor on the event website, the programme, and the information brochure and highlighted as a bronze-level supporter of the event.
- Possibility of placing 1 roll-up at the User Meeting venue.

Package price: Net 1000 EUR
