

Conclusions of Panel // Education and Training

- Education of students and training of young scientists is an essential part of developing staff, students and future users for ELI
- ELI is cultivating a variety of education and training programme (ELISS, Science Challenge, Talent academy)
- Interfacing academic programmes with facilities is critical (Czech Uni Consortium, USAL)
- Opportunity to develop university consortiums to national, trans-national and European training programmes around ELI
- Human resource development in the field of lasers and photonics is interconnected, coordinated and strategic (Laserlab-Europe) and goes beyond academic programmes to include general public outreach
